SUPPLEMENT TO
REPORT NO.

Eisenhuettenwerk Calbe/Saale

1. At the Eisenhuettenwerk Calbe, the foundations of 20 pit furnaces (Mieder-schachtloefen) are being prepared for dynamiting, because it was discovered that the foundations were not sufficiently strong.
2. Until recently work was in progress day and night, but at present construction work is done solely by day by a few workers only.
3. It has been announced to the workers that any security violation, i.e., the dissemination of information concerning this project, will be punished, and that violators will be charged with economic espionage and sentenced to a minimum of four days in prison.

KWU

4. Some of the Kommunal Wirtschafts-Unternehmen are being dissolved; probably because the organization does not pay. In Heustrelitz, for example, the former Saagewerk Hagdorn (sawmill) is being offered to its former owner on condition that he assume responsibility for the debts incurred by the concern after its expropriation.
